

## The DR Barometer Study: Denmark Overview

The DR Barometer study was conducted in 41 countries. In Denmark, 135 adults with diabetes and 7 health care professionals provided new information about the experiences of living with, managing and treating diabetes, DR and DME.

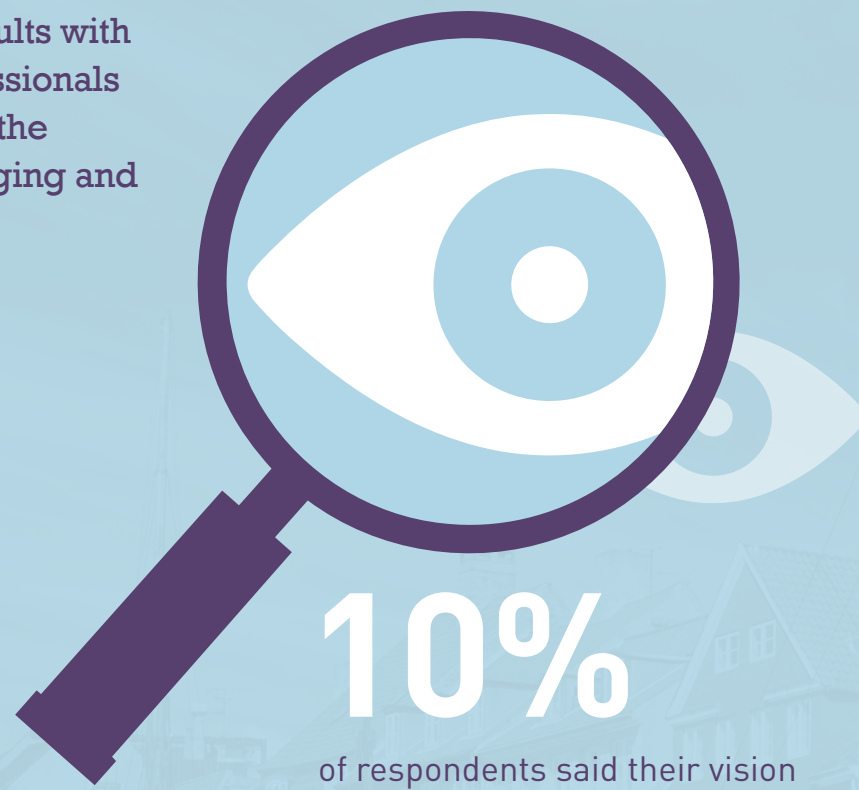

46%

of patients said that **long wait times for an appointment** were a barrier to eye exams

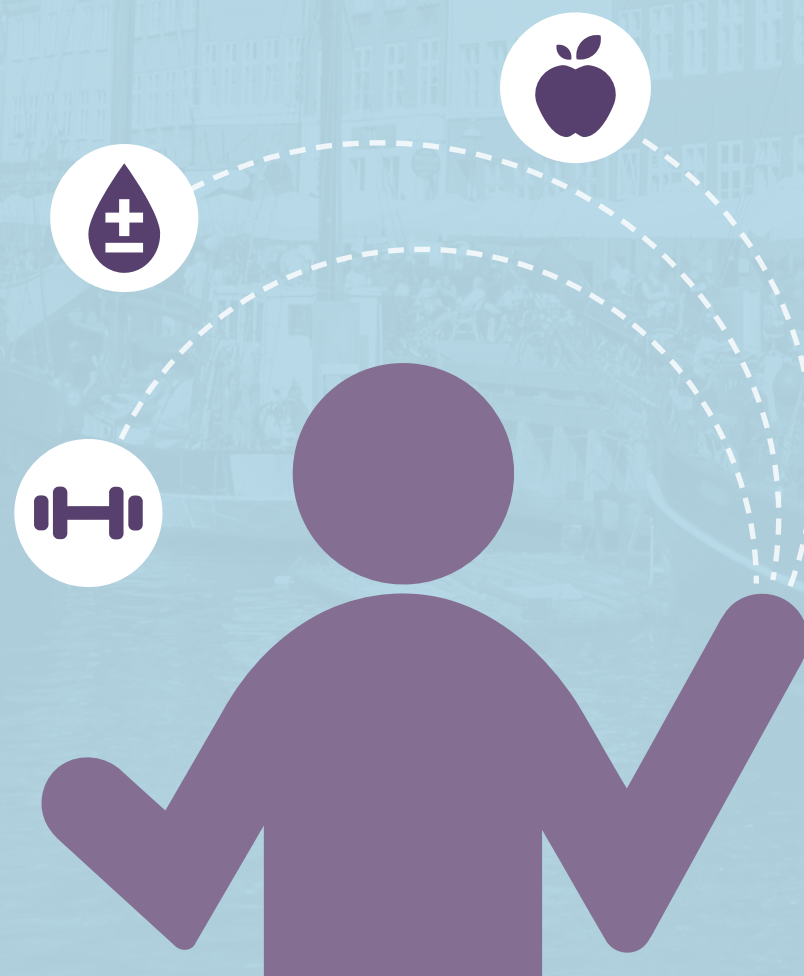

25%

of all providers **did not have written protocols/guidelines** for detection and management of diabetes-related vision loss available

10%

of respondents said their vision impairment due to DR or DME made it **difficult to manage their diabetes**

75%

of patients with vision loss due to DR or DME said that their condition made everyday activities, **such as driving**, working and completing basic household tasks difficult and in some cases impossible

57%

of those with DME experienced days of **poor physical and mental health**

20%

of patients either **never discussed eye complications with their doctor** or did so only after the onset of symptoms

50%

of ophthalmologists **had not received specific training** in the treatment and diagnosis of DR and or DME

DR: Diabetic Retinopathy  
DME: Diabetic Macular Edema
