

The DR Barometer Study: Sweden Overview

The DR Barometer study was conducted in 41 countries. In Sweden, 79 adults with diabetes and 33 health care professionals provided new information about the experiences of living with, managing and treating diabetes, DR and DME.

20%

of patients said that **being unlikely to have eye complications** was a barrier to eye exams

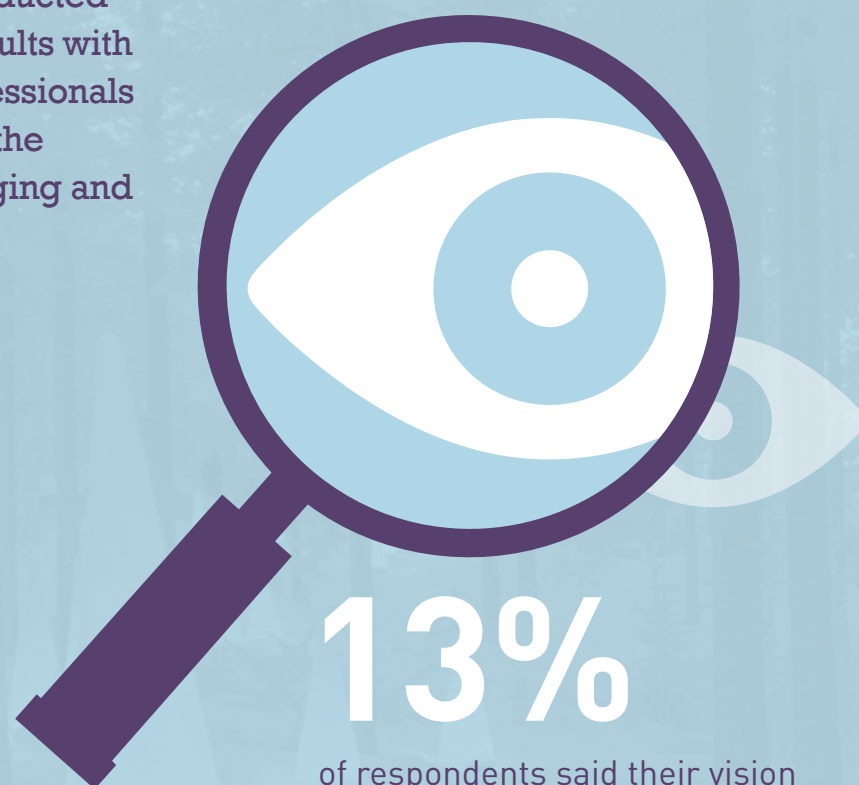

4%

of all providers **did not have written protocols/guidelines** for detection and management of diabetes-related vision loss available

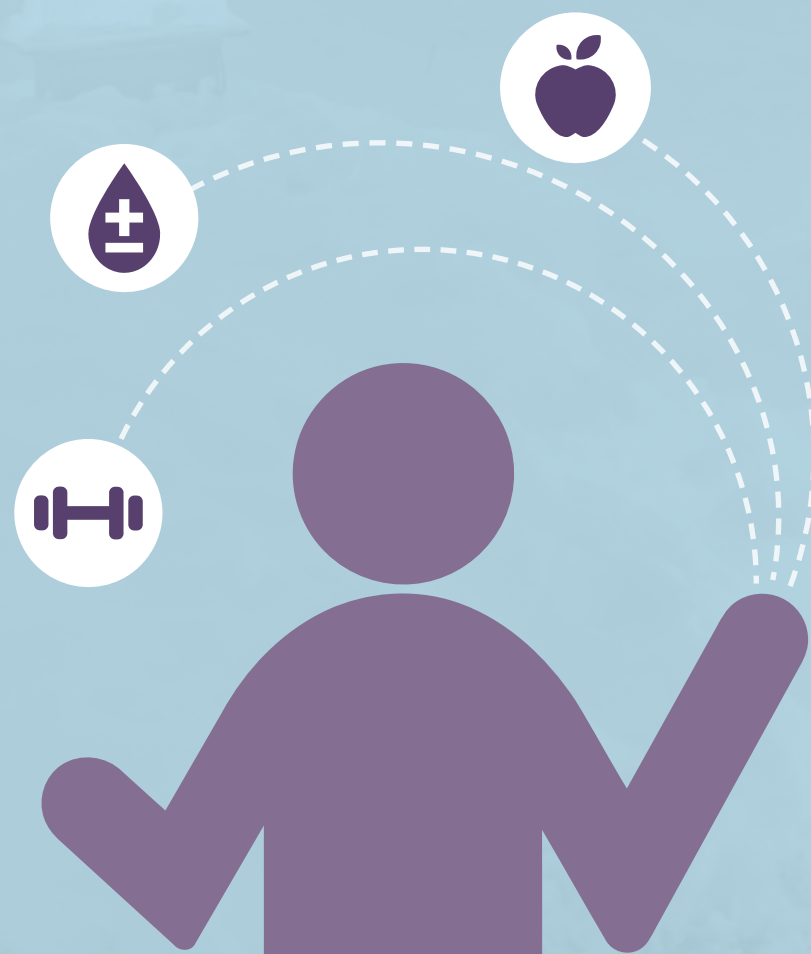

DR: Diabetic Retinopathy
DME: Diabetic Macular Edema

DRBarometer.com

13%

of respondents said their vision impairment due to DR or DME made it **difficult to manage their diabetes**

100%

of patients with vision loss due to DR or DME said that their condition made everyday activities, **such as driving**, working and completing basic household tasks difficult and in some cases impossible

25%

of ophthalmologists **had not received specific training** in the treatment and diagnosis of DR and or DME

50%

of those with DME experienced days of **poor physical and mental health**

38%

of patients either **never discussed eye complications with their doctor** or did so only after the onset of symptoms
